In the Specification:

Please replace paragraph [0035] with the following amended paragraph:

5   [0035] Fig. 2 depicts a typical exemplary index 20 of the present invention. The index

comprises entries for each video data segment recorded upon the storage media. Each

entry (one per video segment) comprises of the following information: the physical

location 21, 22 (sectors, blocks and/or logical block addresses) of the video segment upon

the storage medium; the priority category 23 of the segment, based upon the classification

10   rule set provided by the operator; and other pertinent information 24 for user-defined

rules such as the age [[or]] of the video segment, the media type upon which it is ~~store~~

stored, etc. The index may be of any form or combination of forms, such as arrays or

linked lists.
